TECHNICAL PROJECTS

303 QuesoFinder - [GitHub](#) | [Demo](#) | [Link](#)

SPA designed to showcase, rate, and point people in the direction of Denver's best queso with links to each on google maps

- Engineered user interface using React and React Bootstrap for a simple elegant design
- Constructed a responsive view from any browser and animated with CSS for increased engagement

CryptoCurrent - [GitHub](#) | [Demo](#) | [Link](#)

JavaScript application to track cryptocurrency prices in real time with graphical representation, favorites list and calendar time search features.

- Communicated with multiple CoinGecko API RESTful endpoints to render real-time pricing data
- Collaborated with a colleague with a continuous, ongoing dialogue using Slack and Zoom
- Integrated Chart.js to plot price points on a responsive graph

Forgotten Friend - [GitHub](#) | [Demo](#)

Help people connect with others at the same event to help them find items they may have forgotten after arrival. App contains an items, events and comments list.

- Compiled components using React Native and Expo Go to optimize for iOS and android users
- Modeled a custom database schema and REST API with ActiveRecord and Ruby on Rails
- Implemented with UX and UI in mind to provide an easy to use and seamless user experience
